Ryan-
Sorghum or PFOA/PFOS?

Thanks.

So you are aware, the Administrator is looking for an update on involvement in risk mitigation discussions. I could use something on this, however, it appears as some groups do, they spun him up perhaps unnecessarily.

Ryan,
On Sorghum, Rick Keigwin had a conversation with their lobbyist and their primary concern was related to early engagement in the registration review process. Rick is going to work with his re-evaluation division to try to figure out a way to involve the grower community more effectively in the process. Are there other concerns?

On PFOA/PFOS- do you mean prioritization under TSCA or new chemicals review under TSCA. The chemours briefing paper we provided for the Tuesday meeting mentioned new chemicals. Are these the materials you are referring to and you would like more specifics? Or is there perhaps another briefing paper? I can also check with OW to see where they are.

Thanks.

I need to follow up on the Sorghum Producers meeting regarding their pesticide concern and get some paper for the Administrator on PFOA/PFOS prioritization under TSCA or how the EPA is evaluating these with the Office of Water. We received some briefing materials but not enough which is going to answer questions from Capitol Hill.
